DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

2. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
 - 1. Field of the Invention.
 - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.

Art Unit: 3764

- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (I) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

Claim Rejections - 35 USC § 112

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6, the term “using as a site” is indefinite. In line 8, it is not understood what is meant by the term “straddling relation”. In line 10, it is not clear which structural element being used as the stop, the door frame, or the strip.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Krimmel (Pat. No. 3,279,463).

Art Unit: 3764

Krimmel teaches a method of using a massaging device comprising steps of using a door frame as the site (column 1, lines 14-16), positioning massaging devices (13-16) in a straddling relation to a vertically oriented rectangular strip (11 or 12) disposed along a wall of the door frame. Notes that it is inherent that the door frame usually serving as a stop for a pivotal traverse of a door mounted in the doorway. Figure 2 of Krimmel further shows the instructing step.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chester (Pat. No. 4,416,271).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norris (Pat. No. 2,466,470), Doggwiler (Pat. No. 5,774,907), Ide (Pat. No. 6,056,704), Kost (Pat. No. 1,257,957), and Bleggi (Pat. NO. 5,174,282) are cited to show different massaging devices.
